DETAILED ACTION

Drawings

1. The drawings are objected to because the reference number "210" is handwritten. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Reason For Allowance

2. Claims 1, 2, 4-31 and 33 are allowed.

3. Following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1 and 31, which includes (claim 1) an actuator substrate having an actuator element, an optical waveguide plate, a crosspiece intervening between said optical waveguide plate and said actuator substrate surrounding said actuator element, and a picture element assembly joined onto said actuator element wherein light propagates within the optical waveguide plate; (claim 31) distance between the picture element assembly and the optical waveguide plate in the state of no load is not more than 30 % of a distance of separation between the picture element assembly and the optical waveguide plate in a driving state.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
